LinkedIn the true Business Social Network, it is your on line resume. No other social network screams business quite the way LinkedIn does. During this session we will explore the setup and management of your business profile, how to add connections and how to participate in the LinkedIn community. We will explore opportunities to optimize our use of LinkedIn and mine this growing database for potential partners and clients.

Adding your professional head shot (portrait) to your profile, is part of the package. The quality of your business portrait determines how your peers will view you.
